water-soluble vitamin biosynthetic process
tRNA aminoacylation for protein translation
transmembrane transport
sulfur compound biosynthetic process
purine ribonucleotide biosynthetic process
proteinogenic amino acid biosynthetic process
organic hydroxy compound transport
nitrogen compound transport
monocarboxylic acid transport
monocarboxylic acid catabolic process
L-amino acid biosynthetic process
formate oxidation
DNA damage response
dicarboxylic acid biosynthetic process
detoxification
cytoplasmic translation
cell septum assembly
cell division
cell adhesion involved in single-species biofilm formation
carboxylic acid transmembrane transport
branched-chain amino acid biosynthetic process
aromatic amino acid family biosynthetic process
anaerobic electron transport chain
